

## Lower Cold, Smith & Condon Creeks Linkage Zone

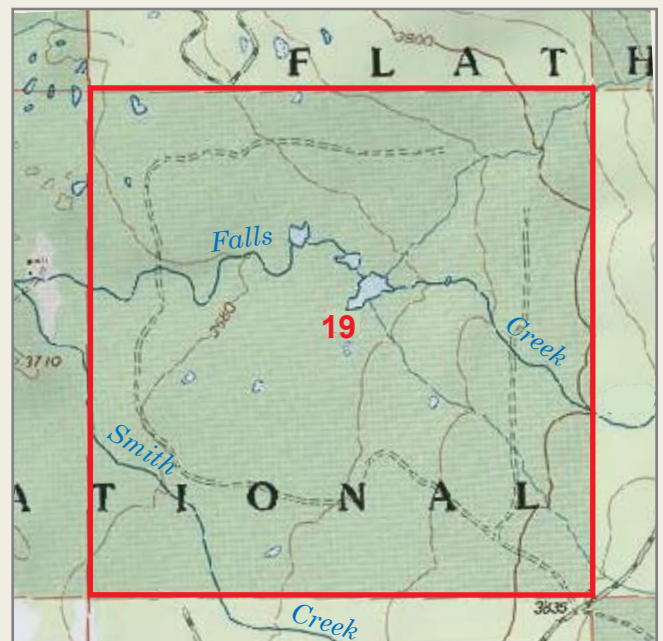

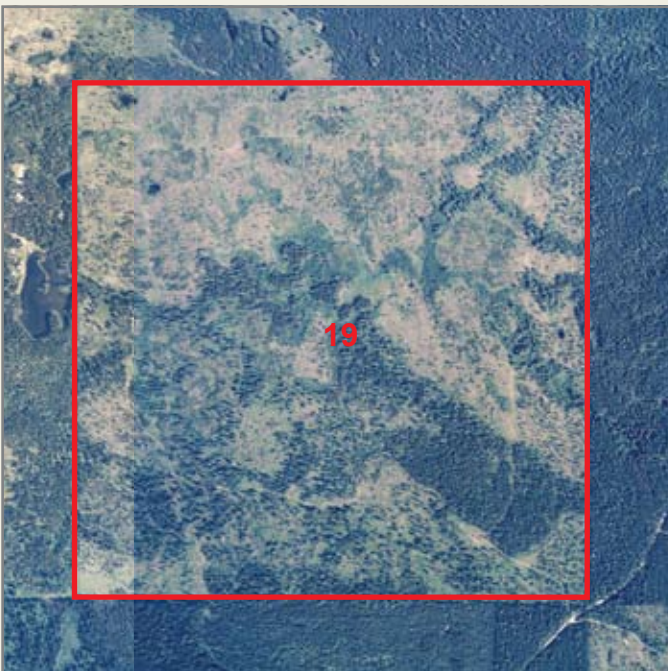

# Falls Creek

## Section 19 T 21 N, R 16 W

- Smith and Falls Creeks, both important bull trout streams, flow through the parcel
- Ponds, some of which contain water howelia, and wetlands supplement exceptional wildlife habitat
- Surrounded by Forest Service on three sides
- Borders Condon Botanical Area

**Total Project Acreage : 635**

*“The Falls Creek area is a good place to ride mountain bikes and get a nice view of the Swan Range. The mountains are up close. You can see the Mission Mountains, too. I like to watch for the Neotropical migrants in the wetlands. The little birds are so colorful.”*
